

International Stakeholder Webinar

Thursday, 22nd April 2021

Phosphorus in Agricultural Systems

Outcome & Impact

In the framework of the ERA-NET PEGaSus project, the stakeholder webinar will discuss recent phosphorus (P) research results on feeding strategies, animal physiology and genetics, soil agro-ecosystems, phosphorus re-use and recycling options, measures of farmers' economic performance, legislative aspects on manure management, and governance & policy instruments.

Partner Institutions

Institute for Farm Animal Biology (FBN), Germany
Agri-Food and Biosciences Institute (AFBI), United Kingdom
Aarhus University (AU), Denmark
Stockholm Environment Institute (SEI), Sweden
Università Cattolica del Sacro Cuore Piacenza (UCSC), Italy

Funding

The PEGaSus project has received funding from the European Research Area Network co-funded on Sustainable Animal Production (ERA-NET SusAn; 2817ERA02D).

Thursday 22nd April 2021
15h00 – 17h00 CEST

15.00	Welcome & Introduction to the PEGaSus project Klaus Wimmers, FBN (DE)
15.10	Animal genetics & physiology Henry Reyer, FBN (DE)
15.30	Value of regional feed Hanne D Poulsen, AU (DK)
15.50	Phytase – animal performance, excretion & P re-cycling in soil Elizabeth Ball, AFBI (UK)
16.10	Manure management & reuse options Arno Rosemarin, SEI (SE)
16.30	Bioeconomics of different farm management scenarios Paolo Sckokai, UCSC (IT)
16.50	Dialogue & Questions
